Unconventional Strategies Aimed at Changing the Way we Work in Healthcare

Laura Fletcher , Kelly Ripley & Jenn Thornhill
May 13th, 2009

Making
Research
Work

Pour que la
recherche
porte ses fruits

Our Vision

Timely, appropriate and high-quality services
that improve the health of all Canadians.

Our Strategic Priorities

Engaging and supporting citizens
Accelerating evidence-informed change
Promoting policy dialogue

Key Assumptions for Adult Learning

- Adults are independent and self-directing;
- They have accumulated a great deal of experience, which is a rich resource for learning;
- They value learning that integrates with the demands of their everyday life;
- They are more interested in immediate, problem-centred approaches than in subject-centred ones; and
- They are more motivated to learn by internal drivers than by external drivers.

"Successful knowledge transfer involves neither computers nor documents, but rather interactions between people."

Reference: Davenport TH. Dec.15, 1995. Think Tank: The Future of Knowledge Management. CIO Magazine.

Discussion 1:

What do you hope to learn in this session?

Have you used (or considered using) any unconventional strategies for sharing knowledge?

What strategies are you aware of (that work)?

Discussion 2

In what circumstances may unconventional approaches to sharing knowledge be useful?

Can you indentify specific topics that are favourable to an unconventional approach?

What circumstances may call for more traditional methods?

Station 1

Mythbusters

Station 2

*Promising Practices
Researcher on Call*

Station 3

Integrating Care in a Hospital Merger (Video)
