

What were the key outcomes for each of your main project objectives?

- **To proactively incorporate ergonomic design into healthcare facility design process**
 - **Reduce contingency funding**
- **To incorporated frontline staff participation in the design process**

What were the key outcomes for each of your main project objectives?

- **To add ergonomic expertise to the design team**
 - **Pre and post occupancy questionnaire**
 - **Work area simulations**

What were the key outcomes for each of your main project objectives?

- **To incorporate workflow efficiencies into the design process thereby increasing quality of patient care**
 - **Safety related medical equipment**
 - **Equipment specifications**
 - **Patient care knowledge**
